# Conserving the Baja California Peninsula

By Debra Valov, LasEcomujeres.org

The Baja California peninsula, 760 miles long and with an area of

89,100 sq. miles, is the world's second longest peninsula. It has almost two thousand miles of coastline, being bound on the west by the Pacific Ocean and on the east by the Gulf of California (or Sea of Cortéz), both of which are incredibly rich in marine life. Its geologic history has led to a uniquely varied environment with a wide range of habitats\* and a high level of biodiversity.

While over 60% of the peninsula's landmass falls within the <u>Sonoran Desert</u>, there can also be found <u>mangrove</u> and <u>dry tropical forests</u> in the south as well as snow-capped mountains with <u>pine forests</u> in the northeast. The Gulf is host to the northernmost <u>coral reef</u> in the America's, while three shallow Pacific Ocean lagoon systems form <u>refuges</u> and provide nurseries for California gray whales (*Eschrichtius robustus*) at the southern range of their annual migratory path.

A small population of <u>berrendo</u>, or Peninsular Pronghorn antelope, an <u>endangered</u>, <u>endemic</u> subspecies (*Antilocapra americana* ssp. *peninsularis*) roams the vast, mostly unpopulated plains of the Vizcaíno Desert Region. The vestiges of yet another protected species, the <u>borrego cimarrón</u> or Peninsular Bighorn Sheep (*Ovis canadensis* ssp. *nelsoni*) are now restricted to the steep slopes of the Sierra San Francisco and Las Tres Vírgenes volcano complex.

While only few remnant populations remain of the original native cultures (Kumiai, Paipai, Cocopa and Kiliwa in northern Baja California and the Cochimí, Guaycura and Pericu of the southern regions), what has survived of the peninsula's prehistoric inhabitants is still evident in the hundreds of rock art sites dispersed throughout the peninsula. Baja's rock art reached its apex in the central region, where cave paintings in the "Great Mural" style (el estilo Gran Mural), estimated to be at least 7,500 years old, adorn isolated caverns and rock overhangs of the sierras.

For the most part, the peninsula is a rugged, uninhabited place, with little water and native species of <u>flora</u> and <u>fauna</u> that are well <u>adapted</u> to their present environment. It is the isolation and rugged wildness of Baja that has attracted so many visitors since the 1800's, many of whom were seeking monetary, scientific and spiritual riches. Others came looking for adventure or to settle Mexico's frontier. Ironically it is the peninsula's pristine nature and isolation that has both lured so many and simultaneously led to the growing <u>exploitation</u> of its resources and its environmental degradation.

## **Protected Areas & Species**

The Baja Peninsula is host to a wide range of officially established <u>protected natural areas</u>, including three terrestrial and and two marine <u>National Parks</u>, three Protected Natural Areas, various Wildlife Sanctuaries, and four <u>Biosphere Reserves</u>, of which the Vizcaíno Biosphere Reserve is the largest protected area in Latin America. The Vizcaíno is also recognized by <u>UNESCO</u> as a <u>World Heritage Site</u> for it's cave paintings and whale and borrego sanctuaries.

In addition to antelope, bighorn sheep, and gray whales, there are a number of other threatened species on the peninsula that are federally protected: five of the world's seven species of sea turtles either nest on peninsular beaches or feed in its waters; a number of other whale species (e.g., Blue, Humpback, Finn) call the region home. Plants species and their habitats are also protected: over 100 species of cacti, about 80% of them endemic and found nowhere else on earth are under federal protection as are mangrove forests and portions of the arid tropical forest of the Cape Region.

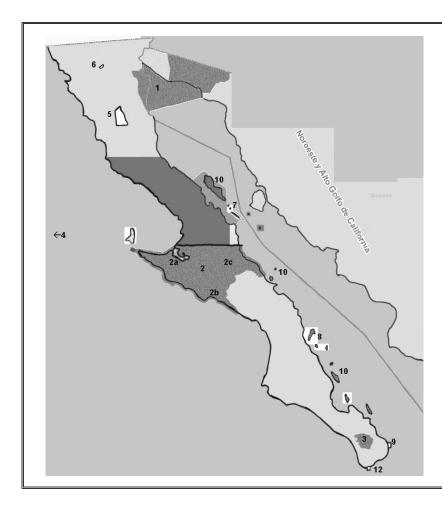

Environmental protection has a long history in Mexico and <u>conservation</u> on the peninsula was well underway by the 1970's with the establishment of the gray whale <u>sanctuaries</u> on the Pacific Coast. Mexico's environmental laws, and more specifically the *General Law of* 

Ecological Balance and Environmental Protection first passed in 1988 (and with several subsequent, significant amendments), are among the world's strongest and most forward-looking. However, like all laws, their effectiveness depends on the government's willingness and ability to apply and enforce the statutes and the influence of the business sector and local governments in bypassing or thwarting them.

A wide range of local and international <u>non-profits groups</u> (NGO's) have formed to address conservation issues and they have continued to be instrumental in conserving the wild peninsula and its flora and fauna. At all levels (from school children to adults, and from small, informal, <u>grassroots</u> groups to <u>service providers</u> to well-funded binational environmental groups) their active participation has been vital in identifying problems and seeking solutions that benefit both

the environment and the economic interests of the communities involved.

The intersection of governmental agencies with private sector businesses and local citizens groups has led to: a capture-captive breedingrelease program aimed at increasing the number of berrendo; a stewardship-hunting program that maintains a healthy population of bighorn sheep; numerous hatcheries that annually release tens of thousands of baby sea turtles; the ongoing protection of the whale nurseries amidst pressures for industrialization of these areas; and a general overall increase in ecotourism. While problems do exist throughout the peninsula, such as a lack of sufficient governmental funding aimed at enforcement and some programs with questionable success, the overall trend is a positive one as all sectors come together to find creative solutions.

#### Biosphere Reserves

- Alto Golfo de California y Delta del Río Colorado, Sonora/BC
- 2. Vizcaíno. BCS
  - a. Ojo de Liebre Complex
  - b. Laguna San Ignacio
  - c. Sierra San Francisco
- 3. Sierra de la Laguna, BCS
- 4. Isla Guadalupe, BCN

#### **National Parks**

- 5. San Pedro Mártir, BC
- 6. Constitución de 1857, BC
- 7. Archipiélago de San Lorenzo, BC
- 8. Bahía de Loreto, BCS
- 9. Bahía de Cabo Pulmo, BCS

#### Protected Natural Areas (ANP)

- Islas del Golfo de California, BC/BCS/Sonora
- 11. Valle de los Cirios
- 12. Las Cascadas de Arena & el Estero San José del Cabo

# Vocabulario—Vocabulary

adapted; to adapt	adaptado <i>adj</i> ; adaptar <i>v</i>
bighorn sheep	borrego cimarrón m
biodiversity	biodiversidad $f$
Biosphere Reserve	Reserva de la Biósfera f
cactus, cacti	cacto, cactus m; cactos, cactus mpl
capture-captive breeding and release program	programa de captura, reproducción en cautiverio y liberación <i>m</i>
cave (rock) paintings, rock art	pinturas rupestres f; arte rupestre
citizens group or organization	grupo civil $m$ o organización civil $f$
conservation; to conserve	conservación f; conservar v
coral reef	arrecife m
degradation; to degrade	degradación f; degradar v
dry (arid) tropical forest	bosque árido tropical
ecologist (a scientific profession)	ecólogo(a) m,f
ecotourism	ecoturismo m
endangered species	especie en peligro de extinción $f$
endemic (restricted to a particular range)	endémico(a)
environment	medioambiente m, medio ambiente m
environmental activist (not necessarily a scientist)	ecologista mf
exploit; exploitation	explotar; explotación f
fauna	fauna f
flora	flora $f$
grassroots; grassroots support	bases (de apoyo político) fp; apoyo popular m
gray whale	ballena gris $f$
habitat, habitats	hábitat m, hábitats mp
hatchery	vivero m
involve oneself	involucrarse
mangroves; mangrove forest	manglar $m$ ; bosque de mangles $m$
national park	parque nacional m
Non-governmental agency (NGO)	organización no gubernamental (ONG) f
peninsula <i>n</i> , peninsular <i>adj</i>	península <i>nf</i> , peninsular <i>adj</i>
pine forest	bosque de pinos <i>m</i>
pronghorn antelope	berrendo m
protect	proteger
protected natural area	área natural protegida (ANP) f (el área, las áreas)
refuge, santuary	refugio m
saltworks	salinera f
sanctuary, refuge	santuario m
sea (marine) turtle	tortuga marina f
service provider (e.g., tour company, guides)	prestador(a) de servicios <i>mf</i>
Sonoran Desert	desierto sonorense
threatened species  United Nations Educational Scientific and Cultural	especie amenazada f
United Nations Educational, Scientific and Cultural	Organización de las Naciones Unidas para la
Organization (UNESCO)	Educación, la Ciencia y la Cultura f
volunteer	trabajar como voluntario(a)
(whale, bird, plant) watching	avistamiento de (ballenas, aves, plantas) m
World Heritage Site	sitio del patrimonio de la humanidad <i>m</i>
